## Personal Profile

---

**Past:** Enthusiastic individual with a passion for development and IT, having explored various aspects of technology from an early age. This journey began with learning programming languages during school and assembling custom computers, which provided valuable insights into hardware and software integration.

**Present:** Currently enrolled in a 12-week Just IT Software Development training program, gaining foundational knowledge in software and web development. This program includes technical training and hands-on project work, aimed at demonstrating the skills acquired in HTML, CSS, JavaScript, and Python.

**Future:** Eager to gain more experience as a technology professional, expanding my repertoire of skills and programming languages to handle diverse tasks. Interested in opportunities that allow collaboration with a dynamic team, contributing to impactful projects, and making a meaningful difference through technology.
